

Chippewa Fire District

Client Building Keys

Chippewa Fire District doesn't want to be responsible for client's building keys used for after business hours fire alarms or fires. We do promote customer owned on site key lock boxes as an alternative.

There are two companies that provide lock box equipment in our service area, keyed uniquely for our FD. These two companies are Tru-Lock Security of Eau Claire and Knox Box (see details below). The fire department's unique keys for these lock boxes are secured in our main fire engines with electronically accountable keypad vault that only select employees have been issued an individual pin for. An alarm continually alerts the entire time the keys are removed from vault and resets only after keys are returned.

➤ Tru-Lock & Security

2080 Truax Blvd

Eau Claire, WI

(715) 825-1540

➤ Knox Box

Nationally known company and utilized by many large city fire departments. It is a mail order supply and customer arranges installation at their site when box arrives. Chippewa Fire District's ID number for Knox is PS-24-0047-11-88
